5

How can I do?中文可以嗎？

item

1. Ordered list item 1
2. Ordered list item 2
3. - Ordered list item 3 ...

item

1. - Ordered list item 4

- Unordered list item
- * Unordered list item...

.. ... in multiple paragraphs

1. Ordered list, first level
    1. Second level
        1. Third level
            1. Fourth level
    2. - Back to second level
        1. *Second?! What happened to third?*

.. *Quiet, you.*

1. Back to first level
2. Still at first level

```
? Definition list
: Definition lists vary only slightly from other types of lists in that list
items consist of two parts: a term and a description. The term is given by
the DT element and is restricted to inline content. The description is given
with a DD element that contains block-level content. [Source: W3C]
? Definition list w/ multiple paragraphs
:: The style sheet provided with this plugin will render these paragraphs...
.. ... to the left of the term being defined.
  ? Definition list w/ multiple "paragraphs"
  : Another way to separate blocks of text in a definition...
  : ... is to simply have multiple definitions for a term (or group of
terms).
```

```
: This definition list has DD tags without any preceding DT tags.
: Hey, it's legal XHTML.
```

```
? Just like DT tags without following DD tags.
?? But DT tags can't contain paragraphs. That would __not__ be legal XHTML.
.. If you try, the result will be rendered oddly.
```
